Join Us...

On the behalf of the EMS Region 5 Regional Trauma Advisory Committee (RTAC) and the Central Georgia Region 5 EMS for Children (EMS-C) Advisory Council, we would like to invite you to join us for the Regional Pediatric Trauma Symposium. Our goal is to improve emergency care through education.

We recognize the remarkable contributions of EMS in saving children's lives. The purpose of this conference is to focus on critical physiology, injuries, and interventions to help EMS practitioners provide the absolute best treatment possible for the injured child.

While the conference is designed primarily with the needs of the EMS practitioner in mind, emergency medical responders, nurses, nurse practitioners, respiratory therapist, physician assistants, and physicians and others providing emergent care to children are welcome.
